    "password": "Pwd@2020"
}
```

Example Request

Create User Example

```
POST /users HTTP/1.1
Host: {{baseUrl}}
Content-Type: application/json
{
    "name": "Yash Jain",
    "email": "yashjain0898@gmail.com",
    "age": 21,
    "password": "Pwd@2020"
Example Response
                                                                                                201 Created
{
  "user": {
    "age": 21,
    "_id": "5e7595462165a8001767a897",
    "name": "Yash Jain",
    "email": "yashjain0898@gmail.com",
    "createdAt": "2020-03-21T04:17:10.844Z",
    "updatedAt": "2020-03-21T04:17:11.140Z",
    "__v": 1
```

POST Logout User

{{baseUrl}}/user/logout

Logout current session

Example Request

Logout Current Session

POST /user/logout HTTP/1.1 Host: {{baseUrl}}

POST Login User

{{baseUrl}}/user/login

Add a description...

```
Body raw (text)
```

```
"email": "yashjain0898@gmail.com",
    "password": "Pwd@2020"
}
```

```
Example Request
                                                                                              Login User
POST /user/login HTTP/1.1
Host: {{baseUrl}}
{
    "email": "yashjain0898@gmail.com",
    "password": "ABCD1234"
}
Example Response
                                                                                                     200 OK
{
  "user": {
    "age": 21,

    "email": "yashjain0898@gmail.com",
    "createdAt": "2020-03-21T04:17:10.844Z",
    "updatedAt": "2020-03-21T04:44:19.885Z",
    "__v": 3
```

POST Upload Avatar

{{baseUrl}}/users/me/avatar

Add a description...

Body formdata

```
avatar
```

Example Request Upload Avatar

```
POST /users/me/avatar HTTP/1.1
Host: {{baseUrl}}
Content-Type: multipart/form-data; boundary=----WebKitFormBoundary7MA4YWxkTrZu0gW
----WebKitFormBoundary7MA4YWxkTrZu0gW
Content-Disposition: form-data; name="avatar"; filename="profile-pic.jpg"
Content-Type: image/jpeg
(data)
----WehKitFormRoundarv7MA4YWxkTr7u0øW
```

GET Read User

{{baseUrl}}/user/me

Reading logged-in user

Example Request Read Logged-in User

```
GET /user/me HTTP/1.1
Host: {{baseUrl}}
```

Example Response 200 OK

```
"age": 21,
  "_id": "5e7595462165a8001767a897",
  "name": "Yash Jain",
  "email": "yashjain0898@gmail.com",
  "createdAt": "2020-03-21T04:17:10.844Z",
  "updatedAt": "2020-03-21T04:17:11.140Z",
  "__v": 1
}
```

POST Create Task

```
{{baseUrl}}/tasks
```

Creating a task with owner as logged-in user

Body raw (text)

```
{
        "description": "Push Source-code to GitHub"
}
```

```
Example Request
                                                                                             Create Task
POST /tasks HTTP/1.1
Host: {{baseUrl}}
{
        "description": "Watch Rise of Skywalker",
        "completed": false
}
Example Response
                                                                                                 201 Created
{
  "completed": false,
  "_id": "5e7596f92165a8001767a89b",

  "createdAt": "2020-03-21T04:24:25.717Z",
  "updatedAt": "2020-03-21T04:24:25.717Z",
  "__v": 0
}
```

GET Read Tasks

{{baseUrl}}/tasks

Reading Tasks of logged-in user

Example Request Read Tasks

```
GET /tasks HTTP/1.1
Host: {{baseUrl}}
```

Example Response 200 OK

```
[
    "completed": false,
    "_id": "5e7596f02165a8001767a89a",
    "description": "Completing API documentation",
    "owner": "5e7595462165a8001767a897",
    "createdAt": "2020-03-21T04:24:16.373Z",
    "updatedAt": "2020-03-21T04:24:16.373Z",
    "__v": 0
```

PATCH Update Task

{{baseUrl}}/tasks/{{TaskID}}

Updating task or completed status of a task or both

Body raw (text)

```
{
        "description": "Watch: The Rise of Skywalker"
}
```

Example Request **Update Task**

```
PATCH /tasks/5e7596f92165a8001767a89b HTTP/1.1
Host: {{baseUrl}}
{
        "description": "Watch: The Rise of Skywalker"
}
```

Example Response

200 OK

```
{
  "completed": false,
  "_id": "5e7596f92165a8001767a89b",
  "description": "Watch: The Rise of Skywalker",
  "owner": "5e7595462165a8001767a897",
  "createdAt": "2020-03-21T04:24:25.717Z",
  "updatedAt": "2020-03-21T04:33:06.920Z",
  "__v": 0
}
```

GET Read Task

{{baseUrl}}/tasks/{{TaskID}}

Read a task by it's id and owner as logged-in user

Example Request Read Task by ID

```
GET /tasks/5e7596f92165a8001767a89b HTTP/1.1
Host: {{baseUrl}}
```

Example Response 200 OK

```
"completed": false,
  "_id": "5e7596f92165a8001767a89b",
  "description": "Watch: The Rise of Skywalker",
  "owner": "5e7595462165a8001767a897",
  "createdAt": "2020-03-21T04:24:25.717Z",
  "updatedAt": "2020-03-21T04:33:06.920Z",
  " v": 0
}
```

DELETE Delete Task

{{baseUrl}}/tasks/{{TaskID}}

Delete a task by ID whose owner is logged-in user

```
Example Request
                                                                                                 Delete Task
DELETE /tasks/5e7596f92165a8001767a89b HTTP/1.1
Host: {{baseUrl}}
Example Response
                                                                                                    200 OK
{
  "completed": false,
  "_id": "5e7596f92165a8001767a89b",
  "description": "Watch: The Rise of Skywalker",
  "owner": "5e7595462165a8001767a897",
  "createdAt": "2020-03-21T04:24:25.717Z",
  "updatedAt": "2020-03-21T04:33:06.920Z",
  " v": 0
}
```

PATCH Update User

{{baseUrl}}/user/me

Updating details for logged-in user

Body raw (text)

```
{
        "password": "Pwd@2020"
}
```

Example Request **Update User**

```
PATCH /user/me HTTP/1.1
Host: {{baseUrl}}
{
        "password": "Pwd@2020"
}
```

POST Logout All

{{baseUrl}}/user/logoutAll

Logout of all sessions

Example Request

Logout All Sessions

```
POST /user/logoutAll HTTP/1.1
Host: {{baseUrl}}
```

DELETE Delete User

{{baseUrl}}/user/me

Deleting logged-in user and corresponding tasks

Example Request

Delete User

```
DELETE /user/me HTTP/1.1
Host: {{baseUrl}}
```

Example Response

200 OK

```
{
  "age": 21,
  "_id": "5e7595462165a8001767a897",
  "name": "Yash Jain",
  "email": "yashjain0898@gmail.com",
  "createdAt": "2020-03-21T04:17:10.844Z",
  "updatedAt": "2020-03-21T04:47:23.972Z",
  "__v": 5
}
```
